Projects

FAKESHOP E-COMMERCE WEBSITE

📅 Jun 2022 – Aug 2022

REACT || REDUX || MONGODB || STRIPE || NODE || EXPRESS
BOOTSTRAP || MATERIAL UI || JAVASCRIPT || CSS || HTML

- This is the e-commerce shopping site created using mern technologies. Here we can be add products to the cart and also able to purchase the products using your card via the stripe payment method.
- It has the functionality of register or login as a user, adding products to the cart, remove from cart, payment processing using stripe, place order and check order history with a neat clean UI.
- Admin will manage this site.

PERSONAL PORTFOLIO

📅 Sep 2022 – Sep 2022

REACT || SANITY || FRAMER MOTION || BOOTSTRAP
JAVASCRIPT || CSS || HTML

- This is the my personal portfolio website. It is a fully responsive web project. The webpage consists of four main sections: about, skill, project and contact. I used extra CSS properties for better UI, layout and **framer motion** is used for animations.

TODO APP

📅 May 2022 – May 2022

REACT || REDUX || MONGODB || NODE || EXPRESS || YUP
BOOTSTRAP || FORMIK || JAVASCRIPT || CSS

- This is the todo app where you can add the todo list. It has the functionality to register or login user and add the todo list which data was stored on the **MongoDB atlas**. I had used **Formik** and **Yup** Libraries for the validations.
